Hello together,

I am Margie Moriones, Im 21 years of age.

My parents cannot afford to send me to college because of financial problem. We all know that college is very expensive. So I decided to searched a work in manila but it will take 10 years for me to work before I can go to college, and now I have given the opportunity to study college through sponsorship.

I'm so glad to meet people who are so kind hearted who's willing to support my needs.

I am proud to let everyone know that I am part of gino's project of sponsoring, which is now I'm studying Entrepreneurship and at the same time working and it is very challenging, although there's is difficulties yet I enjoyed it cause it helps me develop and gain more knowledge not just about this course but step by step of learning.

I am still adjusting the environment at school in all my teachers and classmates, but I'm also doing my best to improve my self confident.

Thank you very much

Margie
